SINGULARITÉS NILPOTENTES ET INTÉGRALES PREMIÈRES

R. Meziani et P. Sad

Abstract

This paper presents a classification of plane dicritical nilpotent singularities, i.e. singularities which have nilpotent linear part and infinitely many separatrices. In particular the existence of meromorphic first integrals is discussed. The same ideas are applied to other kind of dicritical singularities.

2000 Mathematics Subject Classification. Primary: 32S65.

Key words. Singularity of a holomorphic foliation, dicritical nilpotent singularity, meromorphic first integral.
