15	<i>Contents</i>	15
16	1. Basic notions	16
17	1.1. Polynomial systems	17
18	1.2. First integrals and invariants	18
19	1.3. Integrating factors	19
20	1.4. Invariant algebraic curves	20
21	1.5. Exponential factors	21
22	2. Darbouxian theory of integrability	22
23	3. Kapteyn–Bautin theorem	23
24	4. On the degree of the invariant algebraic curves	23
25	5. Darboux lemma	24
26	6. Applications of the Darboux lemma	25
27	7. Algebraic limit cycles for quadratic systems	26
28	8. Limit cycles and algebraic limit cycles	27
29	9. Darbouxian theory of integrability and centres	27
30	10. Non-existence of limit cycles	28
31	11. The inverse problem	29
32	12. Elementary and Liouvillian first integrals	30
33	13. Liouvillian first integrals for the planar Lotka–Volterra system	31
34	14. On the integrability of two-dimensional flows	31
35	15. Darbouxian theory of integrability for polynomial vector fields on surfaces	32
36	15.1. Invariant algebraic curves and exponential factors	33
37	15.2. The surfaces	34
38	15.3. Darbouxian theory	35
