

FATOU AND KORÁNYI-VÁGI TYPE THEOREMS ON THE MINIMAL BALL

NGUYỄN VIỆT ANH

Abstract

In this paper we develop the H^p ($p \geq 1$) theory on the minimal ball. After identifying the admissible approach regions, we establish theorems of Fatou and Korányi-Vági type on this ball.

2000 *Mathematics Subject Classification*. Primary 32A40, 32A35.

Key words. Admissible approach regions, Fatou type theorem, Korányi-Vági type theorem, the minimal ball.
