AN EXAMPLE PERTAINING TO THE FAILURE OF THE BESICOVITCH–FEDERER STRUCTURE THEOREM IN HILBERT SPACE

THIERRY DE PAUW

Abstract: We give an example, in the infinite dimensional separable Hilbert space, of a purely unrectifiable Borel set with finite nonzero one dimensional Hausdorff measure, whose projection is nonnegligible in a set of directions which is not Aronszajn null.

2010 Mathematics Subject Classification: 28A75, 28A80, 53C65.

Key words: Rectifiable set, purely unrectifiable set, Hilbert space, Negligible set.
