NORMAL SEQUENCES WITH GIVEN LIMITS OF MULTIPLE ERGODIC AVERAGES

Lingmin Liao and Michał Rams

Abstract: We are interested in the set of normal sequences in the space $\{0,1\}^{\mathbb{N}}$ with a given frequency of the pattern 11 in the positions k, $2k$. The topological entropy of such sets is determined.

2010 Mathematics Subject Classification: Primary: 28A80; Secondary: 11K16, 37B40.

Key words: normal sequences, topological entropy, multiple ergodic averages, Hausdorff dimension.
