Riesz products, old and recent results

Aline Bonami

Université d'Orléans

After a few reminiscences about problems in analysis that I tackled with Joaquim, I will speak of Riesz products and the way they allow to pass from one setting to another one. I will base myself on old results on one hand, and, on the other hand, on a recent work estimates for weighted sums of finite Riesz products. This last part is a joint work with Rafał Łatała, Piotr Nayar and Tomasz Tkocz.
